

Flat Track Door Hardware

Flat track sliding door hardware installation involves the installation of a track along a surface. A sliding door attachment is added to create an operable door that looks great and is 100% functional. Flat track sliding doors are perfect for indoor or outdoor settings and the hardware that we offer is durable and stylish enough to use anywhere within a large building or in a home. All of our products come with a 20 year iron clad warranty.

Axel Sliding Door Hardware

AXEL was designed to meet the needs of customers who want Specialty Doors' modern design esthetic but also need a high quality product that can ship quickly, be customized on site, and is available at a price that is more accessible for projects requiring multiple systems. AXEL is Specialty Doors' interpretation of the original flat track sliding barn door hardware that has been in use for over 100 years. AXEL utilizes the same raw steel material and flat track as those original systems, but has been designed to be quieter, safer, and more durable. And because AXEL is made from steel, you can easily cut and drill the track at the project site to customize it to your needs. That means you don't need to have all the answers before you order it, and it doesn't have to be cut and drilled before it leaves Specialty Doors, so it can be shipped out within a few days of your order

Sliding Door Hardware

We offer an extensive line of commercial, industrial and residential sliding door hardware from over 15 different manufacturers from Europe and the USA, including top manufacturers Richards-Wilcox, MWE, P C Henderson, Pemko and Coburn Hardware. Find I-beam track, box track, and bypass sliding door hardware with and without fascia. We provide fast, friendly service from initial specification to shipment of your sliding door hardware.
